

The Croft Quick Release Inline Filter is a very popular filter and has a widespread usage in applications within industrial sectors such as Food, Oil & Gas, Power Generation, Chemical and Marine amongst many others.

Available in many different fittings makes this arrangement highly desirable as it can be made to fit straight into your existing application with ease.

Providing some flexibility has been allowed upon installation, it is very easy to remove the internal filter disc for cleaning or replacement. A quick release clamp allows separation of the two halves with little effort. You have a choice to use the internal filter disc as provided or to combine it with mesh to achieve different levels of filtration as required.

Features include:

Standard Sizes 2", 3", 4" & 6"

Standard Discs 40 micron to 4mm

Standard Fittings BSP, NPT, Flanged & Hygenic

QUICK RELEASE FILTERS
