

Croft Filters supply housings to suit a wide spectrum of industry sectors, and have the ability to engineer the right filter vessels to suit our requirements.

With a comprehensive range of products we can manufacture high quality Simplex, Duplex, 'T' Strainer, 'Y' Strainer, Bag and Cartridge Housings as well as custom made special orders.

Strainers are available with various types of connections, materials of construction, gasket composition, closure covers, and screen openings set in the orientation to suit the process.

Croft Filters offer a design/quotation service for all new filter applications. Each system is sized according to requirements
